when José Garbe Vilijn awoke after a sudden brain bleed in 2005 a new life lay ahead of her true to her nature José saw this event as a huge opportunity never could she have imagined that it would gift to her a new paradigm in healing that would take her on an incredible journey of discovery not only has she treated 30 000 patients across the globe but alongside this her pidds solution has allowed her to regain her mobility and brain function she now runs a thriving practice in dubai this revised edition of her book follows the stories of her original case studies first printed in 2008 proving the success of pidds over time it has been inspired by José's promise to reach as many people as possible across the globe to share her knowledge and passion for her logical solution to their health struggles and suffering in life this book offers inspirational stories clear advice and so much joy and celebration a truly uplifting book to read and revisit time and time again

the boston process approach to neuropsychological assessment advanced by edith kaplan has a long and well respected history in the field however its theoretical and empirical support has not previously been assembled in an easily accessible format this volume fills that void by compiling the historical empirical and practical teachings of the process approach the reader will find a detailed history of the precursors to this model of thought its development through its proponents such as harold goodglass nelson butters laird cermak and norman geschwind and its continuing legacy the second section provides a guide to applying the boston process approach to some of the field's most commonly used measures such as the various wechsler intelligence scales the trail making test the california verbal learning test and the boston naming test here the reader will find a detailed history of the empirical evidence for test administration and interpretation using boston process approach tenets the final section of the book provides various perspectives on the implementation of the boston process approach in various clinical and research settings and with specialized populations

touch screen tablets have greatly expanded the technology accessible to preschoolers toddlers and even infants given that they

do not require the fine motor skills required for using traditional computers many parents and educators wish to make evidence based decisions regarding young children s technology use yet technological advancements continue to occur faster than researchers can keep up with accordingly despite touch screen tablets entering society more than 5 years ago we are in the infancy of research concerning interactive media and children the topic has gained traction in the past couple of years for example theoretical papers have discussed how interactive media activities differ from physical toys and passive media christakis 2014 and how educational apps development should utilise the four pillars of learning hirsh pasek et al 2015 yet there has been little experimental research published on young children and touch screen use

provides a comprehensive examination of testing and the assessment process for evaluation of children from ages 3 18 this book is based on the assumption that when a child is referred for assessment the goal is to solve the child s problem by developing appropriate academic or social interventions it emphasises on functional assessment

reading is at the interface between the vision and spoken language domains an emergent bulk of research indicates that learning to read strongly impacts on non linguistic visual object processing both at the behavioral level e g on mirror image processing enantiomorphy and at the brain level e g inducing top down effects as well as neural competition effects yet many questions regarding the exact nature locus and consequences of these effects remain hitherto unanswered the current special topic aims at contributing to the understanding of how such a cultural activity as reading might modulate visual processing by providing a landmark forum in which researchers define the state of the art and future directions on this issue we thus welcome reviews of current work original research and opinion articles that focus on the impact of literacy on the cognitive and or brain visual processes in addition to studies directly focusing on this topic we will consider as highly relevant evidence on reading and visual processes in typical and atypical development including in adult people differing in schooling and literacy as well as in neuropsychological cases e g developmental dyslexia we also encourage researchers on nonhuman primate visual processing to consider the potential contribution of their studies to this special topic

known for its practical applied approach the fourth edition of john venn s assessing student s with special needs continues to

focus on how teachers can use assessment as a guide to instruction this noteworthy revision focuses on what teachers really need to know to include assessment in the curriculum coverage includes all of the core information expected of an assessment text but the book goes far beyond the basics by addressing multicultural considerations technology and assessment high stakes testing and the reauthorization of idea the book clearly shows how assessment is more than giving a test to a child but is an essential tool for teachers as they help students achieve learn develop and grow
